

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (previously presented): A continuously variable transmission having at least two continuously variable transmission parts (6, 7) that are parallelly disposed in a gear train, wherein the two continuously variable transmission parts (6, 7) are connected through a pick-off gear (8) to an input and an output member (9, 10) respectively.

Claim 2 (previously presented): The transmission as set forth in claim 1, wherein the two continuously variable transmission parts (6, 7) comprise a common gear member (1) on the side turned away from the pick-off gear (8).

Claim 3 (previously presented): The transmission as set forth in claim 1, wherein the two continuously variable transmission parts (6, 7) each comprise an input shaft axis (49) and an output shaft axis (48, 50) arranged substantially parallel thereto in a plane of the transmission part, the planes of the transmission parts being arranged parallel to each other.

Claim 4 (previously presented): The transmission as set forth in claim 3, wherein the two planes of the transmission parts are identical.

Claim 5 (previously presented): The transmission as set forth in claim 1, wherein the two transmission parts comprise a common input shaft (1, 49) or a common output shaft (9).

Claim 6 (currently amended): The transmission as set forth in claim 1, wherein between at least one of the continuously variable transmission parts (6, 7) and the pick-off gear (8) there is provided a further variable transmission part (21, 39, 40, 41) ~~such as, more specifically, a clutch or a reverse gear.~~

Claim 7 (previously presented): The transmission as set forth in claim 1, wherein at least one of the continuously variable transmission parts (6, 7) is bypassable (21, 39).

Claim 8 (previously presented): The transmission as set forth in claim 6, wherein the pick-off gear (8) comprises at least one fixable gear member (12, 20).

Claim 9 (new): The transmission as set forth in claim 6, wherein said further variable transmission part comprises a

clutch.

Claim 10 (new): The transmission as set forth in claim 6, wherein said further variable transmission part comprises a reverse gear.
